

Medicina Preventiva Sp

It seems like you're preparing for a residency program in medicine! This comprehensive checklist covers various essential topics, from epidemiology to bioethics. Let's break it down:

Epidemiology:

- Types of studies and measures (RR, OR, NNT)
- Levels of prevention (1st to 4th)

SUS Principles:

- Universal, integral, and equitable care
- Organizational principles (decentralization, hierarchization, regionalization, participation)

Important Laws and Regulations:

- Lei 8080/90 (SUS) and its principles
- PNI (National Health Plan)
- PNAB (Basic Care Plan)
- Rede Cegonha (Health Network)

Bioethics:

- The 4 pillars of bioethics (autonomy, beneficence, non-maleficence, justice)

Additional Tips:

- Be mindful of the distinction between incidence and prevalence.
- Practice calculating NNT, RAR, and RR.
- Review the differences between principles and directives in SUS.

Remember to stay up-to-date with the latest references and guidelines. Good luck with your residency program!
