

Medicina Preventiva Sp Temp

It seems you have a comprehensive review for a medical residency exam or a similar assessment. The content covers various topics, including:

1. Types of studies and measures (RR, OR, NNT)
2. Levels of prevention (primary to quaternary)
3. Notifiable diseases
4. SUS principles (universalidade, integralidade, equidade) and laws (Lei 8080/90)
5. PNI (National Health System Plan) and PNAB (Family Health Program)
6. Rede Cegonha (Health Network) and prioritized policies
7. Bioethics and the Medical Ethics Code

The review also includes some "dicas resumidas" or tips, such as:

- Being careful with the distinction between incidence and prevalence
- Practicing formulas for NNT, RAR, and RR
- Reviewing the differences between principles and guidelines in SUS
- Notifying immediate diseases (meningite, febre amarela, cólera, dengue grave, Covid-19)
- Remembering the 4 pillars of bioethics

The references provided are mostly books and official documents related to epidemiology, medicine, and public health.

Overall, this review appears to be a comprehensive resource for preparing for a medical residency exam or similar assessment.
